To All Interested Parties,

RE: PRIMARY SEDIMENTATION TANK UPGRADES (40103)
Expression of Interest on Site Visit
Our File 0029.372-371

The Resort Municipality of Whistler (RMOW) is requesting expressions of interest to attend a site visit at the wastewater treatment plant for June 19th, 2024 with regards to upgrades on its four primary sedimentation tanks (PSTs). The nature of the upgrades concerns replacing or refurbishing elements of the primary sedimentation mechanism, including the chain and flight shafts. The site visit will be at no cost to the Owner. For the site visit, Primary Sedimentation Tank No. 2 (PST-2) will be drained and cleaned for review Kerr Wood Leidal Associates Ltd. as well as by interested parties through response to this call. Any manufacturer, vendor, supplier or contractor interested in attending site and reviewing the PST-2 equipment must provide written expression of interest to the email address provided by no later than Tuesday June 11th, 2024. Safety shoes, high visibility vests and hard hats will be required by all attending site.
